Organizational Context

Company Overview

- Name: <<organization>>
- Established: 2015
- Headquarters: 123 Factory Lane, London
- Employees: Approx. 1,500 globally
- Annual revenue: Approx. £110m

Background

- Development of Artificial Intelligence (AI)-centric solutions for customers in healthcare, HR and finance, operating in multiple regulatory jurisdictions in Europe, North America and Asia.

Standards Compliance

- In light of the growing emphasis on ethical, transparent, and responsible AI use, <<organization>> seeks to adhere to ISO 42001 for its AI management system (AIMS).

BSIIndia

Geographical Context

- <<organization>> operates in and markets within Europe, North America and Asia.
- Relevant legislation and regulations include:
  - EU:
    - Artificial Intelligence Act (AI Act)
  - UK:
    - Existing legislation restricts how AI can be used in practice in relation to data protection, equality and human rights, and intellectual property.
  - China:
    - Guidelines and legislation have been put in place since 2017. Algorithm provisions around the abuse of algorithmic recommendation systems are in place (since March 2023), including provisions on content management, tagging or labelling, transparency, data protection and fair practices, with additional regulations in certain areas.
  - Japan:

        - Strategies, principles and guidelines published around the major "Society 5.0" project.
    - Canada:
        - The Artificial Intelligence and Data Act (AIDA).
    - India:
        - Intention to move forward with AI regulation and the National Strategy for AI (2018). The central proposal is to introduce a supervisory authority, which, among other things, establishes and administers principles for responsible AI, provides guidelines and standards, or takes over the coordination of authorities in various AI sectors.
    - United States of America:
        - Blueprint for the Development, Use and Deployment of Automated Systems (Blueprint for an AI Bill of Rights). The Blueprint is non-binding and lists five principles to minimize the potential harm from AI systems.
        - National Institute of Standards and Technology (NIST) AI Risk Management Framework (in second draft).

Context of the AIMS

BSIIndia

Aim and Objectives:

- <<organization>> aims to establish a robust artificial intelligence management system (AIMS) to navigate the complexities and challenges of implementing AI technologies across various domains, such as healthcare, HR and finance.
- Inclusion and exclusion criteria:
    - **Inclusion**: All AI-driven products and services, data management, and cybersecurity practices within <<organization>>.
    - **Exclusion**: Customer support and manual data entry processes.
- Envisaged benefits:
    - Streamlining AI model development processes.
    - Enhancing cybersecurity across AI deployments.
    - Assuring stakeholders regarding ethical AI practices.
- Relevant stakeholders:
    - **Internal**: CEO, Chief AI Officer, AI Development Team, Data Management Team, Quality Assurance Team, AI Ethics Team, Cybersecurity Team, Legal Team, Risk and Compliance Team, IT Team, HR Department, Finance Department, Procurement Team, employees

- **External**: Customer organizations, clients, users, partners, regulatory bodies, and third-party vendors.

- <<organization>> positions itself at the forefront of AI technology, striving to address complex challenges across multiple market sectors. The company's strategic focus lies in AI-centric solutions. In addition to the current primary operational regions of Europe, North America and Asia, <<organization>> has a growing interest in expanding into emerging markets.
- Several external factors have shaped <<organization's>> approach towards AI:
  - **Technological Evolution**: The ever-evolving landscape of AI and machine learning technologies has steered <<organization's>> R&D towards next-generation solutions.
  - **Regulatory Environment**: With countries formulating new regulations around AI ethics, data privacy, and usage, <<organization>> continually realigns its AIMS to stay compliant.
  - **Economic Factors**: Economic shifts, especially the growing importance of digital economies, have emphasized the need for more advanced, scalable, and efficient AI solutions.
- Internally, <<organization's>> commitment to AI excellence is reflected in its organizational culture, investments in AI research, and emphasis on AI-centric innovation. However, a notable challenge is ensuring that the rapid pace of AI development aligns with AIMS standards, given their comprehensive and often intricate nature.
