Risk Treatment Plan for AI Asset A4: HR Decision Support System

Developing a Risk Treatment Plan

- The purpose of risk treatment plans (RTPs) is to document how the chosen treatment options will be implemented.

Risk

- There are risks associated with the HR Decision Support System, especially related to potential biases in the AI models, inaccurate predictions influencing HR decisions, and unauthorized access to sensitive employee data.

Reasoning

- The HR Decision Support System is crucial in HR decisions, including recruitment, promotions, and evaluations. It is paramount that the data this system analyzes is not biased and the predictions they provide are accurate. Additionally, employee data security and privacy must be maintained to prevent potential legal and reputational risks.

Accountability

- Jamal Doe, Head of Human Resources, approves the RTP.
- Jap Doe, AI Data Analyst for HR, is responsible for RTP implementation.

BSIIndia

Proposed actions, resources, and performance measures:

Proposed Actions:

- Conduct a comprehensive AI impact assessment to understand potential biases in the HR Decision Support Systems.
- Develop a protocol for data security, ensuring encryption and restricted access to sensitive HR data.
- Train HR staff on understanding AI predictions and the potential pitfalls, ensuring they do not rely solely on AI insights without human judgment.
- Periodic review and recalibration of AI models to ensure their predictions remain accurate and unbiased.
- Ensure conformance to ISO 42001, specifically concerning AI in HR processes.

Resources:

- Head of Human Resources, Jamal Doe, will oversee the RTP's implementation.
- Dedicated AI team for periodic AI model review.

- HR and IT staff will be assigned for collaborative operations, ensuring smooth functioning and maintenance.
- External AI ethics consultants will provide expertise on eliminating biases if required.

Performance measures:

- The following performance measures are defined for monitoring:
  1. Successful completion of AI impact assessment and remediation of identified risks.
  2. Regular audits confirm the security of HR data.
  3. Several HR staff members are trained in AI systems usage and interpretation.
  4. The frequency of AI model recalibrations ensures they remain updated.
  5. Periodic checks confirming conformance to ISO 42001.

Reporting, Monitoring Requirements, and Schedule

Reporting

- Jamal Doe will provide a bimonthly update on AI HR Systems at senior HR Management meetings.

Monitoring

- The internal audit will periodically review the performance measures to ensure consistency and conformance.

Schedule:

- Performance measure 1: 1 Month.
- Performance measure 2: Concurrent with 1.
- Performance measure 3: 2 Weeks after 1.
- Performance measure 4: 6 Months from implementation and then semi-annually.
- Performance measure 5: 3 Months after four and then annually.
