Introduction

- The operation of AI systems will inevitably pose risks to and have impacts on interested parties, aka stakeholders. To fully assess such risks and impacts, it is necessary to first identify all the internal and external interested parties. Such interested parties are stratified as follows:
    - AI Management (AIMS) interested parties: those AI-related interested parties that are relevant to <<organization>> and to the AI development approach as a whole.
    - System-specific interested parties: those interested parties that are specific to individual AI solutions, such as data sources and user groups.
- This document sets out the internal and external interested parties for <<organization>>, covering the only operational AI solution at the time of writing, Healthcare AI. As additional AI solutions come on stream this document will be updated to reflect additional interested parties.

Interested Parties

Overview

- The key interested parties are set out below, grouped by internal and external interested parties, with the source of the interested parties identified as:
    - AIMS: interested parties generic to the organization.
    - System specific: the name of the AI solution to which the interested party is specifically related.
- Note that this document encompasses the key interested parties. <<organization>> may engage with additional external parties on an as-needed basis, but such ad hoc external parties are not included here, although they may be referenced in AIMS/0011 Information for Interested Parties.
- AI system impact assessments can draw from this document for the content of Section E, extracting the AIMS and relevant system-specific interested parties for the particular AI solution concerned.

Internal Interested Parties

Interested Party	Source	Description
AI Development Team	AIMS	Responsible for the development and testing of AI models.
Data Management Team	AIMS	Responsible for data processing and management utilizing Hadoop and Spark, across the production, test and validation datasets (see Section B).
Quality Assurance Team	AIMS	Responsible for quality assurance and validation (of models).
AI Ethics Team	AIMS	Responsible for monitoring data usage for biases and ensuring compliance with fairness and transparency guidelines.
Cybersecurity Team	AIMS	Responsible for all aspects of information security throughout <<organization>>.
Legal Team	AIMS	Responsible for ensuring that data management adheres to ethical and legal standards, maintaining relevant regulatory registrations (e.g., with the ICO) and monitoring the evolving regulatory and legislative landscape.
Risk and Compliance Team	AIMS	Ownership and responsible for maintaining the AIMS, performing risk assessments, internal audits and coordinating management reviews.
IT Team	AIMS	Responsible for the procurement, management and operation of internal IT systems within <<organization>>, including deployment of tools used in developing AI models and Healthcare AI clients to edge devices used internally for access to the system.
HR Department	AIMS	Responsible for the provision of relevant training.
CEO	AIMS	Overall responsible for <<organization>> business globally.
Chief AI Officer	AIMS	Overall responsible for AI development and use within <<organization>>.
Finance Department	AIMS	Enables investments into AI governance systems.
Procurement Team	AIMS	Vets and onboards suppliers providing AI products/services.
Employees	AIMS	Responsible for their appropriate usage of AI, in accordance with the AI Acceptable Use Policy.

External Interested Parties

Interested Party	Source	Description
Customer organizations	Healthcare AI	Organizations taking the Healthcare AI service under contract/license. Interested parties within the organizations include: • Procurement • Legal and compliance • IT.
Microsoft	AIMS	Cloud service provider for Azure, scalable computing and storage resources.
Amazon	AIMS	Cloud service provider for AWS, scalable computing and storage resources.
ICO	AIMS	Data Protection Authority.
HHS Office for Civil Rights	AIMS	Regulatory body for HIPAA.
Cyberspace Administration of China (CAC)	AIMS	Lead regulatory body in China.
National Institutes of Health	Healthcare AI	Third-party provider for PubMed.
Cochrane Library	Healthcare AI	Third-party provider for Cochrane Library.
Clarivate	Healthcare AI	Third-party provider for Web of Science.
Scopus	Healthcare AI	Third-party provider for Scopus.
Chemical Abstracts Service	Healthcare AI	Third-party provider for SciFinder Web.
American Psychological Association	Healthcare AI	Third-party provider for PsycINFO.
TensorFlow	AIMS	Provider for TensorFlow, end-to-end open-source machine learning platform.
PyTorch	AIMS	Provider of PyTorch, technical insights and tools.
Scikit-learn	AIMS	Provider of Scikit-learn, tools for predictive data analysis.
Apache	AIMS	Provider of: • Hadoop: an open-source software for reliable, scalable, distributed computing • Spark: a multi-language engine for executing data engineering, data science, and machine learning on single-node machines or clusters.
Jupyter	AIMS	A suite of tools providing software, open standards, and web services for interactive computing across all programming languages
Posit	AIMS	Provider of RStudio, integrated development environment (IDE) for Python.
Mathworks	AIMS	Provider of MATLAB, which combines a desktop environment tuned for iterative analysis and design processes with a
