Introduction

- To deliver an effective artificial intelligence management system (AIMS), it is necessary to establish the artificial intelligence (AI) objectives that the management system will need to achieve, and to set out a plan for how the objectives will be achieved.
- This document defines the AI objectives, linked to the <<organization>> AI Policy statements, and sets out a plan for achieving these objectives with a schedule for delivery.

AI Objectives and Planning to Achieve Them

High-level Objectives in Support of AIMS/0016 AI Policy

Policy Statement Declaration	<<organization>> Objectives to Meet the Declaration	Practical Objective
<<organization>> Policy Declaration 1: <<organization>> is dedicated to developing and deploying AI that is responsibly, ethically, and socially beneficial when deployed.	**Objective POL-OBJ-01** Ensure all AI systems deliver value to society safely, ethically and equitably.	Require AI system impact assessments evaluating societal risks. Mandate human review of model decisions affecting individuals. Establish user feedback processes on AI services.
<<organization>> Policy Declaration 2: <<organization>> commits to comply with the guidelines for trustworthy AI systems as presented in ISO 42001, the International Standard for 'Information Technology-Artificial Intelligence-Management System' Standard.	**Objective POL-OBJ-02** Attain and maintain ISO 42001 certification for <<organization's>> AIMS	Maintain certification audit schedules and address non-conformances. Review infrastructure/process changes affecting the AIMS. Ensure adequate competent resources to sustain compliance.
<<organization>> Policy Declaration 3: <<organization>> will embed principles of accountability, transparency, technical robustness and societal wellbeing across its AI activities.	**Objective POL-OBJ-03** Embed transparency, accountability and technical assurance across the AI lifecycle.	Standardize model documentation procedures. Validate AI model transparency per intended user needs. Establish a vulnerability disclosure policy for AI systems.

<<organization>> Policy Declaration 4: <<organization's>> cross-functional AI Ethics Review Board provides governance oversight, while impact assessments and ongoing monitoring ensure the safety and fairness of operational systems.	**Objective POL-OBJ-04** Enable continuous oversight, impact evaluation and operational monitoring through a cross-functional review board.	Conduct annual reviews of monitoring procedures. Enable periodic external audits of AI systems. Require prompt issue logging/resolution by the Review Board.
<<organization>> Policy Declaration 5: <<organization>> commits to undertaking stringent security protocols supplement testing and evaluation initiatives to prevent unacceptable AI risks.	**Objective POL-OBJ-05** Mandate stringent protocols to address AI vulnerabilities and prevent unintended harm.	Validate security controls before deploying AI systems. Establish protocols for responsible data usage. Test AI systems for unfair bias.
<<organization>> Policy Declaration 6: <<organization>> strives to integrate emerging regulatory rules and external best practices into the continual improvement of its AIMS.	**Objective POL-OBJ-06** Regularly update the AIMS with emerging regulations and best practices.	Benchmark AIMS against the latest ISO 42001 updates. Review regulatory changes yearly to update policies. Subscribe to AI ethics consortiums for emerging best practices.
<<organization>> Policy Declaration 7: By fostering an ethical AI culture focused on safety and responsibility, <<organization>> aims to earn enduring trust in its intelligent products and services, advancing business and human values.	**Objective POL-OBJ-07** Cultivate organizational culture prioritizing responsibility, safety and trustworthiness of AI systems.	Require training in responsible AI for product teams. Recognize teams demonstrating ethical AI practices. Seek user feedback on trust in AI systems.

<<organization's>> - Operational Objectives

Artificial Intelligence Operational Objectives							Progression			
Priority								On track		
Short Term	Operational - O/P from <<organization>> risk assessments, non-conformance, legal, contractual or regulatory issues or security incidents							Needs a review or action		
Medium Term	In support of the 42001 Alignment Requirements, management reviews, annual tasks, and medium size and duration projects.							Incomplete, failure, overdue		
Long Term	Not driven by 'due date' – broader and wider-ranging to drive the maturity of the AIMS, large projects with longer timescales.							Not started, not in place, not implemented		
Objective ID	**Objective / Deliverable(s)**	**<<organization>> Actions**	**Due Date**	**Responsible**	**Intended Outcome(s)**	**Related**	**Q1**	**Q2**	**Q3**	**Q4**
OP-OBJ-01	Validate that datasets used to train AI systems are unbiased and representative	Perform bias testing and data analytics on datasets Clean or filter inaccurate, unrepresentative or corrupted data Document data provenance and context fully	Quarterly	IA-Team	Robust protocols for unbiased, high-quality datasets bolster model fairness and accuracy thus fortifying public trust in systems	POL-OBJ-05				
OP-OBJ-02	Ensure model decisions are reproducible and stable by retraining models on same data	Log model versions with timestamped audit trails Archive model build and training pipelines Retrain models on same data to validate consistency	Permanent	IA-Team	Able to audit, rollback or replicate models any point in time to isolate issues rapidly restoring confidence	POL-OBJ-05

OP-OBJ-03	Establish protocols for access control, secure storage and transmission of AI data/models	Encrypt data/models in transit and at rest Implement access controls and identity management Conduct periodic penetration tests	Permanent	IA-Team	Enforce best practices for securing AI assets conforming to cybersecurity frameworks and earning user faith in data stewardship	POL-OBJ-05				
OP-OBJ-04	Continually monitor external emerging risks and threat models to enhance system robustness	Scan open-source IP databases for model theft indicators Assess innovations increasing AI model vulnerability Upgrade defences against emerging attack techniques	Quarterly	IA-Team	Stay ahead of vulnerability discoveries augmenting defences before exploits damage credibility or operations	POL-OBJ-03				
OP-OBJ-05	Institute mechanisms for human intervention and overriding model behaviours	Appoint oversight teams to evaluate model decisions Build interfaces for easy human interventions Audit logs of manual overrises to models	Q4	IA-Team	Safeguards for incorrect model conclusions minimize risk and indicate areas needing performance tunings	POL-OBJ-03	N/A	N/A	N/A	
OP-OBJ-06	Mandate explainability measures for high-risk applications with human impacts	Determine use cases requiring explainable models Generate model cards summarizing capabilities Survey users on perceived model transparency	Permanent	IA-Team	Matching transparency features to use cases and risk demonstrates commitment ethically appropriate AI deployment	POL-OBJ-03

OP-OBJ-07	Formally assign responsibilities across AI system lifecycle stages	Appoint AI system owner, custodian per lifecycle stage Maintain RACI (responsible, accountable, consulted, informed) matrix Review role definitions on personnel changes	Ad hoc	HR/IT	Well-defined AI roles and responsibilities manifest organizational commitment to accountability and oversight	POL-OBJ-02				
OP-OBJ-08	Proactively identify legal/regulatory compliance needs and address gaps	Motion legal counsel to track AI governance regulations Perform gap analysis relative to requirements Estimate effort for remediations	Continuous	IA-Team	Staying abreast of legal shifts around AI technologies strengthens compliant posture minimizing disruptions	POL-OBJ-06	N/A	N/A	N/A	
OP-OBJ-09	Implement vendor risk assessment criteria for externally sourced data or models	Enforce security questionnaires for vendors Review vendor quality, ethics and access controls Mandate contractual clauses on data usage	Ad hoc	IA-Team	Diligent partnership curation reduces supply chain vulnerabilities securing public confidence in end solutions	Risk Assessment				
OP-OBJ-10	Establish key performance indicators to systematically measure AIMS effectiveness	Select proxy metrics indicating model risks Design KPI scorecards for transparency Set organization level targets based on benchmarks	Quarterly	IA-Team	Tangible metrics quantifying AI risks support data-driven decisions optimizing model beneficence and safety	POL-OBJ-01
