Nonconformity and Corrective Action Procedure

Objective

- The objective of this document is to define the procedure for maintaining and improving <<organization's>> Artificial Intelligence Management System (AIMS) through identifying and responding to nonconformities and taking appropriate corrective actions.

Introduction

- Nonconformities are defined as:

  "Failure of a control process or non-fulfillment of a requirement (customer, company, regulatory)"
- Corrective actions are defined as:

  "A process to ensure that the cause of nonconformities is investigated, and that action is taken to eliminate this cause and prevent further recurrence."

Identifying Nonconformities

- Nonconformities may be identified through (but not limited to) the following methods:
  - Risk assessment and treatment
  - Internal audits
  - External audits (certification body, customers, and regulators)
  - Business continuity exercises
  - Incidents
  - Process reviews.
- Nonconformities identified through the audit process will be recorded in the audit files and monitored as per the <<reference>> Audit Procedure.
- Nonconformities identified through business continuity exercises will be recorded on the exercise reports and monitored as per the <<reference>> Business Continuity Exercise Post Review Procedure.
- All other nonconformities shall be recorded in the ticketing system as per the <<reference>> Incident Management Process.

Nonconformity Procedure

- The Risk and Compliance Lead shall be informed of all nonconformities.

- The Risk and Compliance Lead shall:
  - Ensure the cause of the nonconformance is identified
  - Assess the likelihood of a reoccurrence
  - Review the proposed corrective action plan to prevent reoccurrence
  - Review the change once implemented with the support of the appropriate business areas
  - Provide a report of nonconformities at the monthly AI Management Review (AIMR) meetings
- The corrective action plan:
  - Must be agreed with the process/risk owner (or representative) and a timeframe set for completion
  - Is to be followed up and signed off once completed
  - If a response is not received within the specified timeframe the Risk and Compliance Lead will request a progress report from the person responsible and agree a timeframe
  - Any corrective action required that is not implemented shall be covered in the next AIMR for resolution.
